Priority Applications (No Type Date): JP 98231724 A 19980818

Patent Details:

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
JP 2000063805	A	7		C09K-003/14	

Abstract (Basic): JP 2000063805 A

NOVELTY - A composition contains water, alpha-alumina, and an alumina sol stabilized by acetic acid.

USE - The composition is used for polishing a magnetic disc substrate.

ADVANTAGE - The use of the composition for polishing the magnetic disk substrate yields a polished surface having low surface roughness, and superior profile irregularity having less scars. High speed polishing is available. The resulting magnetic disk is useful as a low floating type hard disk and allows high-density recording.
